Subject: The code amendment re Bayshore passed

This morning the Lincoln County Commission adopted the code amendment to "move the line" in Bayshore. The code amendment takes effect immediately.

Therefore, anyone, at any time, without permits, can now remove sand from NW Oceania in Bayshore (and the right of ways adjacent to the paved road) and that sand can be transported out of Bayshore.

It will be a code violation, though, if people transport sand from their properties on the west side of NW Oceania into the right of way or the road surface of NW Oceania.

Properties on the west side of NW Oceania remain within the management system of the Bayshore Dune Management Plan (BDMP). Therefore, sand removed from properties west of NW Oceania (the oceanfront properties) must still be carried back to the beach pursuant to the requirements of Lincoln County-issued Remedial Sand Grading permits and the terms of "Drive on the Beach Permits" issued by Oregon Parks and Recreation Department (OPRD).

Please share this important news.
